

Family Treatment & Recovery Centers COVID-19 Update

FCA's Family Treatment and Recovery Centers remain open and continue to offer substance use treatment and recovery support through virtual telehealth services. Long Islanders seeking help for alcohol and/or substance use can call our office at (516) 935-6858 and obtain a same day assessment/intake appointment. FCA can also provide counseling services to loved ones impacted by alcohol and substance use.

Those in need of support can receive individual, group, and family counseling. Individuals are also connected to Certified Recovery Peer Advocates to assist with their recovery goals. A dedicated Care Coordinator is available to help overcome any barriers, and we provide weekly Food Pantry packages to those in need. FCA's medical staff working remotely can provide Medication Assisted Treatment (Suboxone) inductions and maintenance. Groups are offered multiple times each day through a virtual platform to provide the support needed to get through this time together.

Our offices are open with adjusted hours for those without the technology to conduct telephone or telehealth sessions. Our staff can accommodate individuals on-site while remaining compliant with CDC and Department of Health guidelines.

Not ready for treatment? No problem! Call the office and request to speak with one of our Peer Advocates - don't forget to ask about our Peer-Led All Recovery group offered weekly and open to anyone!

During the COVID-19 pandemic, it is incredibly important to stay connected. We want you to remember that FCA is still here for Long Island and still here for you!

Sincerely,

*Dr. Jeffrey Reynolds
FCA President & CEO*
